

Eurofins Bioanalytical Services Outsourcing Partner of Choice

Trusted Partner of Choice

The evolution to externalize more bioanalytical support has created opportunities to build even stronger partnerships with a specialist you can trust and to refocus internal resources. Our mission is to extend our clients' capabilities by combining scientific knowledge, capacity, regulatory expertise, and flexibility to provide the trusted, relevant information required for the drug approval process.

Due to these changes in the BioPharmaceutical industry, there is a need to strategically move more bioanalytical work to a provider with the expertise you need and can trust. With this shift of work from BioPharmaceutical companies to CROs, talented bioanalytical scientists at Pharma are also moving to Eurofins Bioanalytical Services to generate a great and sustainable partnership.

Extensive Experience

- Over 20 years of combined large molecule bioanalytical industry drug development, clinical reporting, and support services
- Proven expertise in navigating regulatory agency requirements
- Experience across all therapeutic areas

With our scientific expertise, and global presence, Eurofins Bioanalytical Services is uniquely qualified to provide clients with reliability they can trust.

The Outsourcing Advantage

SCIENTIFIC / TECHNICAL SERVICES

- Method transfers and partial validations
 - Develop and implement method development strategies
- Provide remote or on-site bioanalytical expertise to US and international clients
- Determine the root cause for assay issues observed during method development
- Validate and identify suitable solutions

REGULATORY / DATA SERVICES

- Conduct pre-qualification / due diligence, GLP, and OECD audits
- Monitor and track ongoing bioanalytical activities at a sponsor partner
- Perform post study data audits

SCIENTIFIC AND BUSINESS PROCESS SERVICES

- Review bioanalytical and site policies and procedures
- Review contracts, method development, and sample analysis study plans and protocols
