ZDHC MRSL Conformance Services

Driving cleaner and safer supply chain
from source

ROADMAP TO
ZERO 

Eurofins Softlines & Leather assists the leather and textile supply chains in ZDHC MRSL Level 1 to Level 3 conformance with comprehensive services across five laboratories, facilitating the industry's goal towards the elimination of hazardous chemicals.

Aligned method for bigger results

The Eurofins | Chem-MAP Programme is a process for verifying MRSL compliance of supplied chemical formulations, to ZDHC conformance Level 1 to Level 3. Working directly with chemical companies, Eurofins | Chem-MAP offers a multi-module approach aimed at developing excellent standards in the chemical manufacturing sector to support the provision of responsible chemicals into supply chains.

The Eurofins | Chem-MAP assessment programme is developed to provide assurance that chemical products are sold (routinely) as compliant (to the ZDHC or other MRSL specification) and that chemical manufacturers have appropriate stewardship, in terms of management and control systems in place to assure that chemical products are being manufactured responsibly and to a recognised standard.

Under the ZDHC MRSL conformance is divided into three levels:

- Level 1 Conformance that requires review of documentation and/or test reports from a third-party laboratory
- Level 2 Conformance that requires review of product stewardship of the supplier by a third-party certifier, in addition to requirement of Level 1 Conformance
- Level 3 Conformance that requires on-site audit of supplier, in addition to requirement of Level 2 Conformance

ZDHC MRSL Level 1 to Level 3 Conformance

With this renowned Eurofins | Chem-MAP, five Eurofins Softlines & Leather laboratories are approved by ZDHC to deliver ZDHC MRSL Level 1, 2 and 3 conformance, namely

- Gurgaon, India
- Como, Italy
- Alicante, Spain
- Istanbul, Turkey
- Northampton, UK – Eurofins | BLC

Apart from MRSL testing for Level 1 Conformance, we offer remote and on-site chemical management audit in line with Level 2 and Level 3 Conformance respectively. The audit, in both remote and on-site formats, assesses the product stewardship practice of the supplier by seven criteria, including:

- Management Controls
- Regulations and Permits
- Chemical Selection and Assessment
- Chemical Storage
- Chemical Use
- Chemical Disposal
- Chemical Distribution

Why Eurofins Softlines & Leather?

With our ISO-17025 accredited Softlines & Leather laboratories located in Asia, Europe and North America, we provide product quality and safety solutions to buyers and suppliers around the world.

Customers partnering with us for their ZDHC MRSL conformance will enjoy more benefits:

- Most of our ZDHC-approved laboratories are located in key chemical substances production countries, and in major garment and footwear manufacturing sites in Asia and Europe, offering proximity to shorten turnaround time.
- Our product Eurofins | Chem-MAP is one of the few services providers that can provide Level 1 to Level 3 Conformance, enabling one-stop-shop experience to our customers.
- Both of our Technical Competence Centres, the laboratories in UK and Spain, are approved to deliver the conformance services. Together with testing experts in other three laboratories, we are well-positioned to support our customers with our robust technical expertise and testing know-how.
