

**Apple Woolly Aphid Trial
Newent, Gloucestershire, UK**

**Woolly Aphid –
The ‘rockstar’ of the aphid world!**

A close-up photograph of an apple branch with several green leaves. The branch is heavily infested with white, woolly aphids, which are clustered in several places, particularly at the leaf axils and along the stem. The background is a soft-focus green, suggesting an outdoor setting. A semi-transparent white box with orange text is overlaid on the right side of the image.

**Apple Woolly Aphid –
Out in force...**

A close up...

Image  | rjfischer / Stockimo / Alamy Stock Photo

A close-up photograph of several red apples hanging from a branch. The apples are in various stages of ripeness, with some showing significant dark brown, irregular scab lesions on their skin. The background is filled with green leaves and stems, slightly out of focus.
